

Professional Skin Care
with a Clinical Approach

Exfo Masks & “A-Peel” Product Recommendations

Are you ready to take your Spa/Salon/ to a new level in skin care? Have you considered the benefits of offering clinical services in your Spa/Salon setting? Clients are looking for answers to skin care problems by seeking out medical procedures. Why not be a bridge between the Spa/Salon setting and the medical facility by offering services that control and correct specific conditions without the down time of medium and deep peeling agents. **UNFADING BEAUTY CLINICAL SKIN CARE**, the solution! “Professional Products with a Clinical Approach”

UNFADING BEAUTY CLINICAL SKIN CARE is not for every Spa/Salon. Aestheticians desiring to use **UNFADING BEAUTY CLINICAL SKIN CARE** must have at least 6 months practical experience prior to making application for our video certification training program. Experience is critical to the success of our product line. The aesthetician’s ability to properly analyze the skin plays a critical role in determining the direction and final result of the client’s program.

Our peeling agents are incorporated into 10 effective and proven **Treatment Protocol** packages. Each **Treatment Protocol** listed below gives a description of the peeling agent it uses, along with a list of conditions the **Treatment Protocol** is recommended for.

Alpha 20% & Alpha 30% “A-Peels” are unbuffered, glycolic acid products with a free acid content of the same percentage as their names. These products are excellent for acne management and hypo skin types including maturing and sun damaged skin types. *Beta Clean Cleanser* contains salicylic acid and is excellent for defatting the skin in preparation for peeling. *Alpha Beta Toner* is a glycolic, salicylic acid toner also used to defat the skin. *Hydra Gel Calming Mask* is a soothing formula excellent for use after glycolic acid treatments to rehydrate and calm.

Anti-Oxidant Loading Treatment is a very aggressive treatment for sun damaged, dehydrated or hypo skin types. *Take Off 20% Spicy Exfo Mask* is a pumpkin-based product that should be regarded with the same respect as a 20% glycolic acid. *A+* and *C Therapy 1* are the highest percentage of active allowable without prescription. Choice of masks are either *“Bio”tanical*

Professional Skin Care
with a Clinical Approach

Coolly, a mint and algae, peel off mask with a cool sensation as the mask sets, or *AHA Green Tea Coalesce Sheet*, a collagen infused sheet mask with both AHA and Green Tea.

Dermal Debris is a treatment for Hypo, Acne Prone skin types. The treatment uses *Berry Elixir Exfo Mask*, a gentle anti-bacterial yet stimulating product used to initiate desquamation in the management of acne. *“Bio”tanical Coolly* is a soothing, algae, peel off mask with a cool sensation as the mask sets.

Dermal Repair is a gentle, calming treatment for hyper inflamed or Grades 3 and 4 Acne. *Cherry “A-Peel”*, an acid blended cherry-based peeling agent, is rich in vitamins and nutrients for damaged skin types. The mask choices make this treatment perfect for any type of oil content. Pleasant and effective.

Hyper-derm Revitalization Treatment is a very active treatment, excellent for promoting desquamation in acne prone skin types. This treatment is also excellent for dehydrated or hypo skin types, including sun damaged clients. *Take Off 15% Spicy Exfo Mask* is a pumpkin-based peel, which should be regarded with the same respect as a 15% glycolic acid. *C Therapy*, with 20% L ascorbic acid, is the highest percentage of active ingredient allowable. *Oxy Prep, Hyperderm Massage Lotion* and *Oxy Plus* are active oxygenation products to help promote rapid cellular turnover, making this treatment excellent for anti-aging and acne treatment. *Time Terminator* is an almond crème incorporating the use of Epidermal Growth Factor.

Moist & Calm is a gentle, yet hard working treatment for distressed, Grades 1 and 2 acne and hypo inactive skin types. The nutrients packed in *Take Off 15 Spicy Exfo Mask*, our pumpkin-based peel, combined with the moisture from the *Hyaluronic Coalesce* sheet mask, which is being aided in penetration by the *Thermal Blue Mask* (our earthen, warmth and occlusive “Top Layer” mask), makes this a hydrating, moderately stimulating yet enjoyable treatment.

Nutrient Shock is an aggressive treatment for dehydrated, hypo or capillary prone skin types. The treatment uses *Beta Exfo Mask*, a 20% salicylic acid in a cherry crème base. The treatment also incorporates *“Bio”tanical Coolly*, a mint, algae peel off mask that calms the skin with a cold sensation as the mask sets.

Professional Skin Care
with a Clinical Approach

Red Be Gone Treatment is a gentle, non-irritating treatment for rosacea clients, as well as any client with inflamed, irritated hyper active skin. The treatment features *Pro-Zyme Powder* with pancreatin and bromelin, blended with *Pro-Zyme Activator* containing a low concentration of glycolic acid. The choice of either *“Bio”tanical Coolly* or *Allanyoin/Panthenol Coalesce Sheet* as mask options makes this a versatile and pleasant experience for a wide variety of conditions. Our *Red Be Gone* products were formulated with rosacea clients in mind.

Tighten & Tone Treatment is a mildly aggressive treatment useful in the management of hypo acne, especially maturation arrest. This treatment will also hydrate and stimulate dehydrated skin as well as mature or sun damaged skin. *Cherry “A-Peel”* utilizes ground cherries in this acidic, enzymatic mask. *Firming Blend* and *Tightening Gel* together are known as *“Skin Tight” Mask*. The tightening of the mask as it dries creates deep, dermal stimulation. Both *A+* and *C Therapy 1* contain the maximum allowable actives without a prescription.

UB 1 “A-Peel” is a Jessner peel that can be aggressive. Care should be taken to prepare the clients skin several weeks before use. This treatment is versatile and can be used in acne management as well as sun damaged, maturing, hypo inactive skin types. *Alpha Clean Cleanser* is our AHA blend cleanser and is excellent for defatting the skin in preparation for this peel.

TCA 1 “A-Peel” is a 12.5% trichloroacetic acid peel. A useful tool in the management of hyperpigmentation, acne and anti-aging programs. Our *Alpha Clean Cleanser* along with our *Alpha Beta Toner* is used to defat the skin in preparation for this peel. Post procedure homecare is critical in the success of this treatment.
